██████████  
ANTECH Acct No. 5689

Accession No. ORAB36989238  
Received 05/21/2021  
Reported 06/03/2021 06:25 AM

Test Requested	Results	Reference Range	Units
<b>Culture, Urine</b>	#1 #2 #3 #4 #5		
Preliminary #1	05/24/2021		
NO GROWTH ON SOLID MEDIA IN 24 HRS.			
Final Report	05/25/2021		
Organism #1	Lactobacillus species		
Approximately 100,000 colonies/ml			

↳ Not a  
True Organism

### FIRSTtract™ Urine Culture

SOURCE Urine  
 Collection Method Not Stated  
 FIRSTtract™ Culture with ID and susceptibility in progress  
 ANTECH FIRSTtract™ rapid culture analysis detected suspicious patterns in this sample. This could represent non-biological particles, fastidious pathogens, residual antimicrobial activity or non-urinary tract contaminants. Extended incubation is required. Preliminary report should be available within 36 hours.

Antech FIRSTtract™ is a state of the art, patented light scattering technology capable of detecting bacterial growth within hours, not days. FIRSTtract™ demonstrates excellent performance with high sensitivity and specificity in comparison to a standard urine culture.
